

November 1, 1962.

Mr. Hilsman:

My personal file

This is a stab at developing a running chronology of major developments in the Cuban crisis. Parts of it are far from complete, while some items I have included may have to be deleted.

As it now stands, the chronology would have to bear a SECRET classification, because of reference to the October 26 Khrushchev letter to President which has never been made public.

On p. 5, under date October 24, last item - I have not seen Khrushchev's letter (or message) to President of October 24, but President in his letter to Khrushchev of October 25 refers to latter's communication of the preceding day, and from context of President's letter it would appear that Khrushchev in his October 24 message denied that offensive weapons had been shipped to Cuba.

I am keeping this chronology up on a day-to-day basis for future reference

W. C. Sullivan
